

Pediatric Grand Rounds

Thursday, February 13, 2020

Stecker Auditorium

Registration 7:30am

Lecture 8:00 – 9:00am

From Left to Right

Speakers: Karen McCoy, MD & Kimberly J. Novak, PharmD, BCPS, BCPPS, FPPA – Nationwide Children's Hospital

Title: Managing Cystic Fibrosis in the 2020s. How will it look?

Dr. Karen S. McCoy is chief of the Division of Pulmonary Medicine at Nationwide Children's Hospital and professor of Pediatrics at The Ohio State University College of Medicine. Her clinical interests focus on managing patients of all ages with cystic fibrosis (CF) and pediatric asthma. Dr. McCoy's research interests revolve around clinical outcomes and trials in cystic fibrosis and asthma. She is the principal investigator for the CF Therapeutic Development Center. She is the director of the CF Center, Co-PI of CF Therapeutic Development Network, Co-PI of the CF Research and Development Program (C3). Dr. McCoy has completed over 100 clinical trials in people with CF.

Kimberly (Kim) Novak, PharmD, BCPS, BCPPS, FPPA is the Advanced Patient Care Pharmacist in Pediatric and Adult Cystic Fibrosis at Nationwide Children's Hospital in Columbus, Ohio. Dr. Novak completed her Doctor of Pharmacy at West Virginia University in 2002 and then continued her training at University of Kentucky for her Pharmacy Practice Residency, Pediatric Specialty Residency, and Teaching Certificate. She has held a specialist position in Pulmonary Medicine at Nationwide Children's Hospital since 2004. She has been the residency program director for the PGY2 pediatric pharmacy residency since 2006 and has trained 25 PGY2 pediatric pharmacy residents during her tenure. She also serves as a preceptor for residents in the PGY1 Pharmacy Residency and PGY1/PGY2 Health-system Pharmacy Administration Residency programs as well as visiting residents from programs in Ohio, West Virginia, and Kentucky. She has an adjunct appointment as Clinical Assistant Professor at The Ohio State University College of Pharmacy and regularly teaches in the Pediatrics Elective and Therapeutics courses in addition to precepting students. Her practice and research interests include cystic fibrosis, pharmacokinetics, antimicrobial optimization, mental health, and mentorship of pharmacy residents and students. She is board certified in adult and pediatric pharmacotherapy and was inducted as a Fellow of the Pediatric Pharmacy Association in 2019.

All are welcome to attend! Breakfast provided.

Educational Objectives:

1. Recognize recent changes in management of people with cystic fibrosis.
2. Identify genetically targeted treatments with highly effective modulators for most people with cystic fibrosis.
3. Describe potential strategies for people with cystic fibrosis not eligible for HEMT.
